OPERATING SYSTEM : Windows: troubleshooting skills, Linux: command-line operations and system

PROJECTS

- **Filmoji:-** A cutting-edge entertainment recommendation platform designed to enhance streaming experiences. Built using HTML, Tailwind CSS, JavaScript, React, and Redux, it leverages Gemini integration to provide highly personalized movie and web series suggestions tailored to user preferences. The platform features an intuitive and responsive UI, seamless state management, and intelligent AI-driven recommendations, ensuring users discover content that aligns with their unique tastes. Filmoji is fully responsive and optimized for mobile phones, delivering a smarter and more engaging entertainment journey on any device.
- **IvanEatoz (Online Food Delivery App):-** A modern application under development to streamline the food ordering experience. Built with HTML, JavaScript, CSS, Tailwind CSS, and React, the app offers a seamless user journey, enabling users to browse menus, filter options, place orders, and track deliveries in real-time. Key features include user authentication for secure access, dynamic UI components powered by React, a responsive design with Tailwind CSS, and integrated secure payment systems.
